Figure 3: Plotting the estimated slopes for the Museum model and Tobit model against each other having the variance of individual specimens set to low. The vertical and horizontal lines correspond to the true value of the slope.

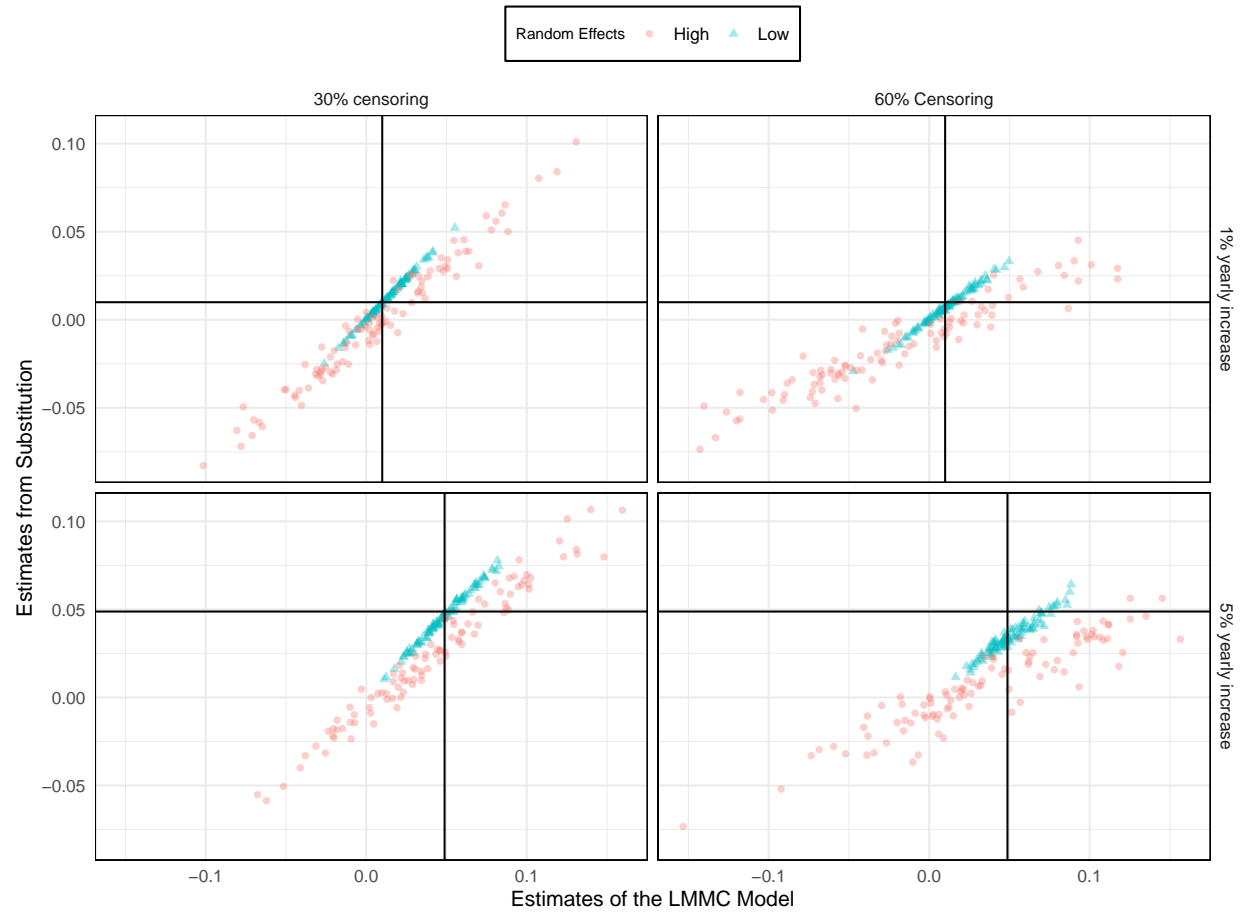

Figure 4: Plotting the estimated slopes for the Museum model and Tobit model against each other having the variance of individual specimens set to medium. The vertical and horizontal lines correspond to the true value of the slope.

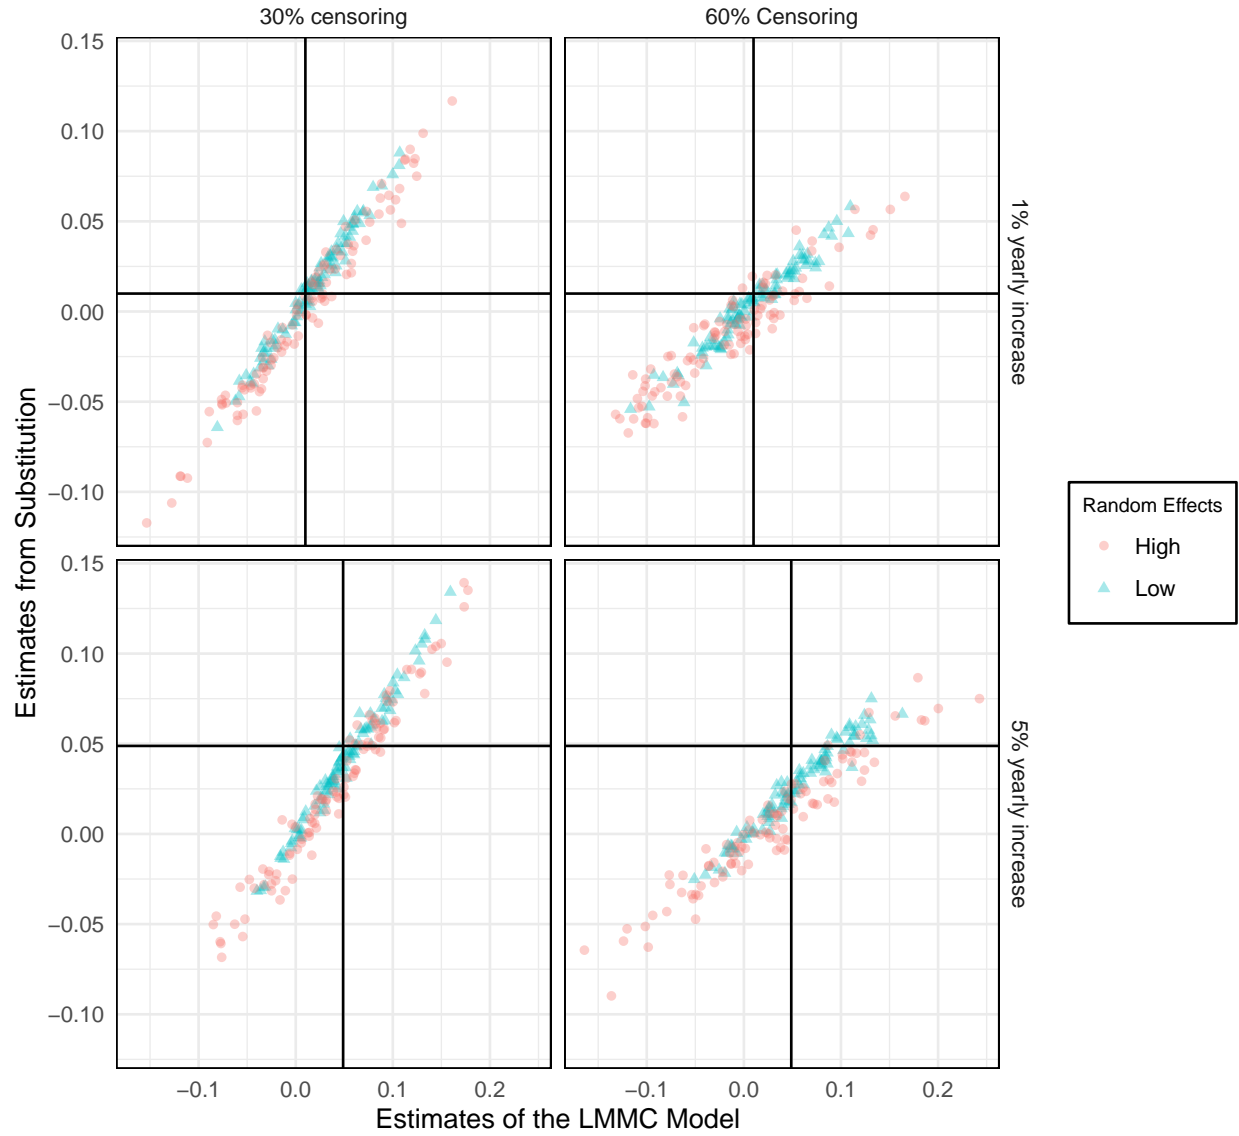

Figure 5: Plotting the estimated slopes for the substitution method and the LMMC model against each other having the variance of individual specimens set to high. The vertical and horizontal lines correspond to the true value of the slope.
