Figure 5: Plotting the estimated slopes for the Museum model and Tobit model against each other having the variance of the individual specimens set to low while the between_year variance is set to high.

Figure 4: Plotting the estimated slopes for the Museum model and Tobit model against each other having the variance of individual specimens set to high while the between year variance is set to low.

Figure 2: Plotting the estimated slopes for the Museum model and Tobit model against each other having the variance of both error terms set to high.

Figure 3: Plotting the estimated slopes for the Museum model and Tobit model against eachother having the variance of both error terms set to low.
